If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

REASONS FOR ALLOWANCE

Claims 1, 3-15, 17-27, and 30-33 are pending in this application.

Claims 1, 3-15, 17-27, and 30-33 are allowed.

Applicants are notified that the Examiner of record in this application has changed.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: In the previous rejection under 35 U.S.C. § 103(a), the Examiner applied the closest prior art available to conclude that the claimed invention is obvious over the prior art. In doing so, the Examiner applied the Watt reference teaches a method of compressing a data set by representing an object parametrically, and that a person would be motivated to do so to reduce the size of the data set. However, the Watt expressly teaches that:

"But parametric surface fitting requires us to construct an entire analytical description from a mere collection of points. Far more information has to be generated than actually exists so consequently a good deal of assumptions have to be made along the way."

(Watt, page 101, left column)

Therefore Watt does not appear to teach a method of compression and a person of ordinary skill in the art would not be motivated to use the Watt reference to reduce the size of a data set.

The closest prior art of record fails to teach or disclose:

Creating a parametric representation of the teeth from the meshes representing the teeth and the inside and outside meshes, the parametric representation comprising exposed tooth surface image data and unexposed tooth portion image data, and further providing compression of the digital data set (claim 1);

Creating a parametric representation of the teeth from the meshes, the parametric representation comprising exposed tooth surface image data and unexposed tooth portion image data, and further providing compression of the digital data set (claim 24); or

Creating from the digital data set of meshes a parametric representation of the digital data set comprising a curve network fitted to the digital data set, the parametric representation comprising exposed tooth surface image data and unexposed tooth portion image data, and further providing a compressed version of the digital data set (claim 30);

In combination with the other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
